Noida, Uttar Pradesh
12+ Years Experience

CLOUD & INFRA

Azure: VMs, VNet, NSG, Storage
AWS: EC2, VPC, IAM,
Security Groups
Microsoft Azure Fundamentals
Linux (Ubuntu/CentOS), Windows Server
Nginx / Apache

CI/CD & DEVOPS

Jenkins CI/CD Pipelines
Azure DevOps Pipelines
Github Actions
Git (Branching, Merging, PRs)
Docker & Kubernetes
Release & Change Management

IAC & CONFIG MGMT

Terraform
Git / GitHub / GitLab

SCRIPTING & AUTOMATION

Bash / Shell Scripting
Python (Operational Automation)
Deployment & Rollback Scripts

MONITORING & SUPPORT

Prometheus, Grafana, CloudWatch
Azure Monitor, Log Analytics
Log Analysis & Incident Troubleshooting

NETWORKING & SECURITY

TCP/IP, DNS, Routing, Firewall
VPC/VNet, Subnets, NSGs
Microsoft Entra ID (Azure AD), RBAC

TOOLS & OTHER

CI/CD: Jenkins, GitHub Actions, Azure DevOps
Version Control: Git, GitHub, GitLab
IaC: Terraform
Containers: Docker, Docker Compose
Orchestration: Kubernetes,EKS
Cloud: AWS, Microsoft Azure
Monitoring: Prometheus, Grafana, CloudWatch, Azure Monitor, ELK
OS & Web Servers: Linux, Ubuntu, CentOS, Windows Server, Nginx,
Scripting: Bash/Shell, Python
DevOps Boards

CAREER OBJECTIVE

Senior DevOps / IT Infrastructure Engineer with 12 years of overall IT experience, including 8 years managing production infrastructure across AWS and Microsoft Azure. Skilled in building and supporting Jenkins CI/CD pipelines, Terraform-based Infrastructure as Code, Linux server administration, and Docker/Kubernetes deployments. Strong background in cloud networking, security, monitoring (Prometheus, Grafana, CloudWatch, Azure Monitor), and incident/production support, with hands-on experience in Bash and Python scripting for operational automation. Seeking a Senior DevOps Engineer / DevOps Lead role to drive infrastructure reliability, streamline deployments, and mentor engineers across cloud and DevOps operations.

PROFESSIONAL EXPERIENCE

Senier DevOps / IT Infrastructure Engineer - PowerHF India Pvt. Ltd.

22-Feb 2021 – 3rd Aug-26, Noida, New Delhi

- Managed production infrastructure across **AWS and Microsoft Azure** environments.
- Provisioned and maintained **EC2, VPC, IAM, Security Groups, Azure VMs, VNet, NSG, and Storage**.
- Built and supported **Jenkins CI/CD pipelines** for automated application deployments.
- Managed Git repositories, branching, merging, pull requests, and release workflows.
- Used **Terraform** for Infrastructure as Code and cloud resource provisioning.
- Supported **Docker** containerization and basic **Kubernetes** deployments.
- Administered **Linux servers**, including services, users, packages, disk, processes, and troubleshooting.
- Configured and supported **Nginx and Apache** web servers.
- Monitored infrastructure using **Prometheus, Grafana, CloudWatch, Azure Monitor, and Log Analytics**.
- Performed log analysis, alert investigation, incident troubleshooting, and production support.
- Troubleshot AWS/Azure networking including **VPC/VNet, Subnets, DNS, Routing, Security Groups, NSGs, and Firewall**.
- Used **Bash/Shell and basic Python** for operational automation.
- Participated in deployments, releases, rollback, change management, and post-deployment validation.
- Maintained infrastructure documentation, incident reports, and operational procedures.
- Worked with **Jira and Azure DevOps Boards** for task and incident tracking.

Cloud / Infrastructure Engineer — Kutumbh Care Pvt. Ltd.

Dec -2018 – Feb 2021, Jaipur, Rajasthan

- Managed **Microsoft Azure** infrastructure across development, testing, and production environments.
- Provisioned **Azure VMs, Storage, VNet, Subnets, NSGs, and Load Balancers**.
- Used **Terraform** for Azure infrastructure provisioning and standardization.
- Managed **Entra ID, RBAC, permissions, and cloud security**.
- Monitored infrastructure using **Azure Monitor and Log Analytics**.
- Supported Linux/Windows servers, application deployments, and environment configuration.
- Troubleshot CPU, memory, disk, network, application, and server availability issues.
- Supported cloud resource optimization, backup, recovery, and resource lifecycle activities.
- Maintained infrastructure documentation and coordinated production issue resolution.

Best Quality Award — Quess Corp

LANGUAGES

Hindi (Native)
English (Professional)

Linux Administrator / Support Engineer — Rudra Infra Build Pvt. Ltd.

Feb 2018 – Dec 2018, Dehradun, Uttarakhand

- Administered **Ubuntu and CentOS Linux servers** and provided infrastructure support.
- Monitored **CPU, memory, disk, processes, services, and system availability**.
- Managed Linux services, packages, users, permissions, and basic configurations.
- Performed log analysis and troubleshooting of server/application issues.
- Supported **TCP/IP, DNS, Firewall, connectivity, and remote server troubleshooting**.
- Assisted application installation, configuration, deployment, and service management.
- Monitored alerts and escalated complex incidents to L2/L3 teams.
- Maintained server records, documentation, and operational checklists.

Desktop / NOC Support Engineer — NR Switch & Radio Services

Jul 2016 – Feb 2018, Ludhiana, Punjab

- Supported **NOC operations, infrastructure monitoring, and L1 incident management**.
- Monitored server, network, and service availability.
- Performed L1 troubleshooting for system, server, connectivity, and service issues.
- Investigated alerts using service status, resource utilization, connectivity, and logs.
- Supported Linux and remote server environments.
- Escalated critical incidents to L2/L3 teams and maintained incident tickets.
- Prepared shift handover reports, monitoring records, and operational documentation.

Technical Support Engineer — Quess Corp Limited

Oct 2015 – Jul 2016, Delhi & Punjab

- Provided **L1 technical support** for hardware, software, system, and network issues.
- Performed system installation, configuration, testing, and deployment verification.
- Troubleshot OS, application, hardware, and basic connectivity issues.
- Logged incidents and followed defined escalation procedures.
- Coordinated with technical teams for issue resolution.
- Maintained technical reports, checklists, and support documentation.
